Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/567,344	Applicant(s) PALTIELI ET AL.	
	Examiner BAISAKHI ROY	Art Unit 3737	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/23/09 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 2, and 28 are rejected under 35 U.S.C. 102(e) as being anticipated by Calderon et al. (7447542). Calderon et al. disclose a method for early detection of a pregnancy complication (col. 1 lines 54-56) by touching a position sensor or position sensing system 22 to a point on a fetal presenting part of a fetus in a mother and capturing a position of the position sensor or position sensors 24 (col. 3 lines 23-26) and detecting a pregnancy complication sign based upon a predefined criterion for the pregnancy complication or indicate that the fetus being in distress. The pregnancy

Art Unit: 3737

complication may be the onset of premature or preterm labor (col. 4 lines 1-7) with an increase in contraction with a predetermined frequency (col. 1 lines 17-22, col. 4 lines 8-12) and uterine muscle activity (col. 1 lines 31-39).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 29-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Calderon et al. in view of Dullien (5370135). Calderon et al. teach a method for detecting pregnancy related complications and performing therapy to improve fetal survival (col. 2 lines 22-41). The therapy comprises tocolytic therapy (col. 9 lines 43-50) and corticosteroids therapy (col. 11 lines 2-6). Dullien further teaches monitoring the effects of the therapy (col. 15 lines 30-col. 16 line 15). It would have therefore been obvious to one of ordinary skill in the art to use the teaching by Dullien to modify the teaching by Calderon et al. such that the pregnancy complication can be effectively treated to improve fetal survival.
